DETAILED ACTION

Response to Amendment/Arguments

1. This Office Action is in response to the Response/Amendment filed on November 3rd, 2005. Claims 1-15 are now canceled. Claim 16 are now pending in the application.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 16 is directed to the nonstatutory processes, which implement the method for monitoring and tracking all TCP connections of a mobile station in a SIP-compliant network ... comprising the steps of a SIP-EYE agent monitoring session set up and disconnect messages of said TCP connections, and creating and keeping a data structure for each of said TCP connections for the mobile station, each data structure comprising

- (a) an original IP address of said mobile station,
 - (b) a previous IP address of said mobile station,
 - (c) a current IP address of said mobile station, and
 - (d) an original IP address of a corresponding host node;
- wherein ... of the TCP connection.

which preempts to a data structure (or merely manipulates data, abstract idea) without practical application, and meets neither of “useful, concrete and tangible result”; *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02 (see MPEP 2106.II.A). Therefore, the “acts” of the claimed process are not being applied to appropriate subject matter and thus cannot constitute a statutory process.
